

# Xpert Archiver

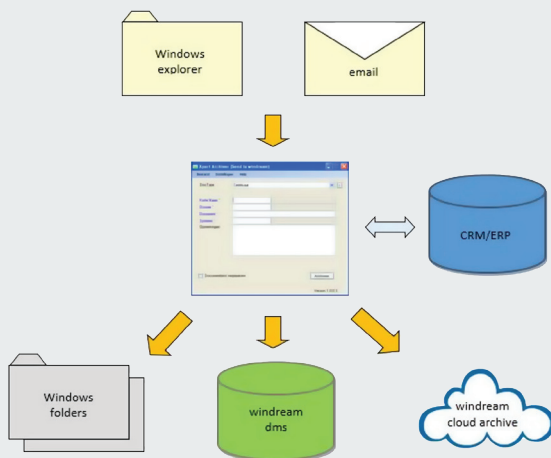

File archiving has never been this easy!

The **Xpert Archiver** makes archiving files very easy! The (Windows) folder structure of the archive is automatically created. When archiving to the windream document management system, metadata from the CRM/ERP system is added to the documents.

## The Xpert Archiver in 3 steps

- Select the files/emails to be archived. The files can be selected in Windows Explorer or in Outlook.
- Select the customer or project to which the files belong. The Xpert Archiver connects to the CRM or ERP system for convenient selection.
- Click the 'Archive' button and you are done! The files are automatically archived in Windows folders, the windream digital archive or the windream cloud archive.
