

Xpert Translator

Document translation has never been this easy!

The **Xpert Translator** makes translating of documents very easy! The selected documents are sent to Transenter's online translation services via a secure connection. You have a choice of translation options (machine or human translation) and target languages. The source language is automatically detected.

The Xpert Translator in 3 steps

- Select the files to be translated. The files can be selected in windream.
- Select the translation type(s) and the target language(s) and send the files to Transenter for a price quote.
- Accept the price quote or make changes. If the price is accepted, translate the documents! The documents are returned via a secure connection.

Transenter's platform provides both highly secured-automated translation (Lingosec) and professional quality human translation that leads to a reduction in both time and financial costs within the translation process.

Transenter was founded in the Netherlands in 2002, starting as a traditional Translation and Language Service Provider. Since 2008, **Transenter** has expanded to become an innovative language technology company.

LINGOSEC

Linguistic security leader

Transenter won the LT-Innovate Award 2014 for **Lingosec**, sensitive content protection software that minimises the risks of confidential information leakage and economic espionage in the process of automated and human translation.
